

Westport Club Out

The Westport Club at Port Macquarie recently completed a five-star outdoor terrace to ensure smoking patrons were not excluded from club activities. Outdoor gaming areas were also provided at both ends of the terrace. The client brief given to designers Innersphere was to create an environment that had a 'Noosa-style' resort feel. A casual relaxed atmosphere was achieved by using light-toned natural materials with hard wearing surfaces. Furniture was sourced from Classique Leisure Products.

The theme has been reflected both indoors and outside giving the club a very friendly, laid back ambience. Materials such as the terrazzo tile flooring, supplied by Urban Stone, have been specifically chosen to reduce maintenance while providing a long-term good-looking solution.

The plant-scaping, also designed by Innersphere, has been kept minimal while at the same time achieving maximum impact. The pots were supplied by The Terracotta Trading Company.

Since its opening, the terrace has been one of the most popular areas of the venue and business has consistently increased as a result.
