

How Club Ashfield profited by our design

When General Manager Robert Cassano needed help to look at a long term strategy to improve the performance of the Club's gaming and Food + Beverage assets he turned to Innersphere.

Over a period of two years Innersphere rearranged the Gaming Installation. This resulted in a substantial increase in revenue. The upgraded entry bar and finishes created an environment which gave the club and its patrons a new lease on life and attracted new customers.

Over a staged series of renovations, including the recently completed alfresco gaming, the club has consistently increased its earnings.

For a diagnostic appraisal of your gaming and entertainment environment, call Michael Sadubin on (02) 9959 5656
